The School of Architecture + Design at VIRGINIA TECH is offering its seventh SUMMER WORKSHOP for high school students June 25 - June 29, 2007.

All students starting grades 9-12 and interested in SEEING, MAKING and THINKING are welcome to this on-campus studio introducing architecture and design as a line of study.

The course consists of five days of full instruction as a part of the Summer Session of the College with the opportunity to INTERACT with ARCHITECTURE and DESIGN STUDENTS during their Summer Studios. Instruction is by Professors Donna Dunay and Robert Dunay.

Registrations will be taken until the course is full. If interested, please send a $40 registration fee with the attached form to reserve your place.

Comments from graduates of inside ARCHITECTURE

The summer session expanded my knowledge of the architecture field greatly. I learned of the different majors associated with Architecture and gained interest in the field of Industrial Design.

The course showed me what college is really like by giving us freedom to study and work independently.

Before inside Architecture I thought that Architecture was purely drafting, and now I realize that is more of an art.

We interacted with Architecture students throughout our course, viewing their diverse work and receiving their concepts of Architecture and Virginia Tech’s programs.

Make check payable to Treasurer of Virginia Tech and send this form to:

The School of Architecture and Design at Virginia Tech is offering a summer course to Middle and High School students who will be starting grades 9-12 in the fall. For individuals thinking about a career or an education in Architecture, this week long session will give intense exposure into the ways in which the architect thinks and works. Primarily a hands-on experience, students will work with long time educators and practitioners in exercises designed to stimulate discussion and discovery of issues affecting the profession. No prior course or subject experience is necessary, just the initiative to break the bounds of conventional modes of thinking.

THE INSTRUCTORS

Donna Dunay, AIA, is Professor of Architecture at Virginia Tech and Chair of the International Archive of Women in Architecture. She has conducted extensive research and field work concerning patterns of development and community structure. Her work has been recognized with three statewide Excellence in Architecture Awards from the American Institute of Architects and a Distinguished Planning Award from the Virginia Chapter of the American Planning Association.

Robert J. Dunay, AIA, IDSA, is T. A. Carter Professor of Architecture and Director of Industrial Design. A generalist in pedagogy and practice, his work and interests have ranged from planning and architecture to graphics and product design. He serves as a primary faculty for Virginia Tech’s entry in the Solar Decathlon Competition and recently designed a house for the abc TV show Extreme Makeover. His work has been published in international and national journals, as well as regional and state publications.

Monday June 25th through Friday June 29th 10 am to 5 pm.
Tuition fee $440. (includes registration)
Course enrollment will be limited. If interested, please send $40 registration to hold your place.

Meals and lodging are available as part of the university Dorm and Dining Programs.
Lodging $27.00/day* (double occupancy)
Meals $21.00/day* (prices subject to change pending Board of Visitors approval)
